BAKERIES

**NEW FUNCTIONALITY WITH THE APPLICATION OF NEW
ARA IONIC ACCELERATOR**

It is common knowledge that:

- crystals of carbonate and the salts present in water change in precipitates and become calcareous scale, which is the main cause for the reduction of flowing water in the pipes;
- consequently it increases water pressure inside the pipes with risk of damage;
- filters are clogged;
- it is necessary to intervene with chemical treatments that, restoring the functionality of the devices and the pipes, attach also them, with consequent damages to the environment.

With the installation of NEW ARA we obtain:

FOR EQUIPMENTS

- elimination of all the previous incrustations in the tubes and the systems, preventing the re-formation;
- elimination of the use of chemistry and the relevant costs;
- elimination of dregs in the humidifier of the oven;
- reduction of the maintenances of the systems, and important reduction of the relevant costs;
- longer life of equipments, pipes and nozzles.

FOR BREAD

- improvement in rising;
- better quality;
- cutback of bacterial flora and relevant outcomes.
