

OUR STRENGTHS

- 1) *We are the only ones* to guarantee a permanent natural magnetic field of 10.000 Gauss certified and continuous.
- 2) *We are the only ones* to have a permanent natural magnetic field compared to the induction magnetic field.
- 3) *We are the only ones* to have a magnetic field with 8 alternating positive/negative poles on the same bar.
- 4) *We are the only ones* to have magnets covered with 2 mm food-grade Teflon that do not alter the chemical-physical balance of the water.
- 5) *We are the only ones* to have a different technical drawing for each model.
- 6) *We are the only ones* to propose a system for cold water and a system for hot water.
- 7) *We are the only ones* to transform 100% of the limestone molecule into aragonite.
- 8) *We are the only ones* to guarantee the irreversible transformation of calcium carbonate into aragonite.
- 9) *We are the only ones* to comply with the Law on electromagnetic compatibility which requires less than 1 Gauss measurable at 5 centimeters, so we can install our systems anywhere without the consequence of interference.
- 10) *We are the only ones* to guarantee the effectiveness of the transformation of calcium carbonate into aragonite, regardless of the length of the pipe treated.

- 11) *We are the only ones* to have been on the market for 40 years, providing constructive and applicative know-how in all possible installations.
- 12) *We are the only ones* to treat all types of water regardless of hardness.
- 13) *We are the only ones* to offer the range from 1/2" (35 l/min) up to 28" (45.000 l/min).
- 14) *We are the only ones* to adapt the angle of the flanges (flanged articles from 2" to 28") according to the specific needs of the installation.
- 15) *We are the only ones* to offer such a high flow rate for each individual item, that it is not comparable with other systems.
- 16) *We are the only ones* to guarantee our systems for life.
- 17) *We are the only ones* to offer the supply of threaded products with terminals (normally male/male) male/female or female/female under the same conditions.
- 18) *We are the only ones* to declare that the transformation of calcium carbonate into aragonite requires at least 2 bar of pressure and that therefore in the absence of this indispensable element, the devices do not provide the required benefits.
- 19) *We are the only ones* to have a Curie point at 250°C.
- 20) *We are the only ones* to offer this same technology for fuels, but this is another story
