COFFEE MACHINES

**NEW FUNCTIONALITY WITH THE APPLICATION
OF NEW ARA IONIC ACCELERATOR**

It is common knowledge that :

- Crystals of carbonate and the salts present in water change in precipitates and become calcareous scale, which is the main cause for the reduction of flowing water in the pipes;
- consequently it increases water pressure inside the pipes with risk of damage;
- filters are clogged;
- it is necessary to intervene with chemical treatments that, restoring the functionality of the devices and the pipes, attach also them, with consequent damages to the environment.

**With the installation of NEW ARA
we obtain :**

- ü elimination of all the previous incrustations in the tubes and the recycling systems, preventing the reformation;
- ü longer duration of the equipments, the tubes and the nozzles;
- ü reduction of the maintenance of the systems, with consequent incalculable economies;
- ü elimination of chemical descaling, but also aggressive and polluting;
- ü elimination the use of chemistry and the relevant costs;
- ü elimination of the sour taste of the coffee for machine maintenance;
- ü elimination of the equipment for the treatment for the water;
- ü shorter time in water heating;
- ü reduction of consumption of the electric power;
- ü safeguard of the environment.
