FOUNTAINS

**NEW FUNCTIONALITY WITH THE APPLICATION
OF NEW ARA IONIC ACCELERATOR**

It is common knowledge that:

- crystals of carbonate and the salts present in water change in precipitates and become calcareous scale, which is the main cause for the reduction of flowing water in the pipes;
- consequently it increases water pressure inside the pipes with risk of damage;
- filters are clogged;
- it is necessary to intervene with chemical treatments that, restoring the functionality of the devices and the pipes, attach also them, with consequent damages to the environment.

**With the installation of NEW ARA
we obtain:**

- elimination of all the previous incrustations in the tubes and the recycling systems, preventing the reformation;
- elimination of the use of chemistry and the relevant costs;
- reduction of the maintenances of the systems, with consequent incalculable economies;
- strong reduction of the cost for cleaning;
- longer duration of the equipments, the tubes and the nozzles;
- impediment to the formation of algae, microscopical fungi and bacteria;
- better transparency of the water;
- bacteriologically pure water.
