SNOW GUNS

**NEW FUNCTIONALITY WITH THE APPLICATION OF NEW
ARA IONIC ACCELERATOR**

It is common knowledge that:

- crystals of carbonate and the salts present in water change in precipitates and become calcareous scale, which is the main cause for the reduction of flowing water in the pipes;
- it increases water pressure inside the pipes with risk of damage;
- filters are clogged;
- it is necessary to intervene with chemical treatments that, restoring the functionality of the devices and the pipes, attach also them, with consequent damages to the environment.

With the installation of NEW ARA we obtain:

- ✓ elimination of all the previous encrustations in the tubes and the systems, preventing the re-formation;
- ✓ pipe fittings, nozzles and all equipment work better and have a longer average life;
- ✓ reduction of the maintenances of the systems, with consequent incalculable economies;
- ✓ elimination of chemical descaling agents, but also aggressive and polluting;
- ✓ safeguard of the environment;
- ✓ better water vaporisation, faster crystallisation and a better snow mantle;
- ✓ better volume of snow, using the same quantity of water with a decrease in electric energy waste.
