**WINE INDUSTRIES AND DISTILLERIES**

**NEW FUNCTIONALITY WITH THE APPLICATION OF NEW  
ARA IONIC ACCELERATOR**

It is common knowledge that:

- crystals of carbonate and the salts present in water change in precipitates and become calcareous scale, which is the main cause in the reduction of flowing water in the pipes;
- it increases water pressure inside the pipes with risk of damage;
- filters are clogged;
- it is necessary to intervene with chemical treatments that, restoring the functionality of the devices and the pipes, attach also them, with consequent damages to the environment.

### **With the installation of NEW ARA we obtain:**

- ✓ elimination of all previous incrustations in the tubes and the systems, preventing the re-formation;
- ✓ reduction of the maintenances of the systems with consequent incalculable economies;
- ✓ greater duration of the equipments, the tubes and the nozzles;
- ✓ better washing of barrels, vats, tanks and equipments (ex. pumps and pipages);
- ✓ better washing of systems (ex. bottling system, cooling and pasteurization, etc.);
- ✓ better general washing of the premises, of the columns of cooling of the stills and of agricultural machines;
- ✓ better treatment of the water used in the analysis laboratory;
- ✓ better treatment of the water used for chemical and natural treatments and moreover for the treatment of the tanks of fermentation;
- ✓ the prevention of the diseases of the plants;
- ✓ smaller operating costs.
